1	This is a great and fast paced course. There wasn't much of a warning on it upon sign up though. I think if I wasn't into neuroscience I would have had a really tough time in this class!
2	This class is awesome instruction wise! It's definitely one of the best classes I have taken. But I would change the amount of time that the lecture videos are available to at be until the test day, since the tests are so lecture intensive and some students do not have time to watch the videos within a week, since they do have other classes and tests at the same time to worry about. Another thing I would change is the late assignments, or at the very least the revision of assignments. I feel that during this COVID time there are so many struggles we are facing and we get stressed out. Some students might be going through terrible things and I think that it is unfair that they have everything going on in their life at once and have to worry about getting their class assignments in on time. I have been struggling with my anxiety in a very real way and sometimes I don't notice if I turn in the correct file, despite having done the work on time. It sucks that I have all this work done essentially in vain because I clicked on the wrong file and now cannot have the file I worked on graded just because of the late policy.
3	None. It was fantastic, and I would take it (technical and material difficulties and all) again if I could.
4	No suggestions.
5	LOVE THIS PROFESSOR!!!!

6 I struggled with the dynamic between assigned material vs exam/homework material. I think that's to do with the questions using complex thinking and the material had a lot of the basic info that needed to be combined

1 yeehaw! ur great

2	<p>You discouraged office hours and talking to you because you claimed you never had time and that scared me away from going over exams since you said you couldn't meet for a month and by then the next exam would have come and gone.</p> <p>I really enjoy the way you are always excited to teach and care about the students/respond to our lab thoughts.</p>
3	<p>YOU ARE THE BEST!</p>
4	<p>One of the hardest but best classes and instructors I have had!</p> <p>Sometimes takes a long time to respond to email, doesn't know an answer to a question during lecture, and some material seems to come out of nowhere so it can be difficult to study.</p> <p>But very enthusiastic instructor who it was very and engaging to learn from!</p>
5	<p>No suggestions, but there are not enough positive things I could say about Dr. Jennings. By far one of the best professors I have ever met, and an even better human being. She truly cares for her students and goes above and beyond to show that. Her hard work does not go unnoticed. This semester was difficult for all of us, but Dr. Jennings' resilience really went a long way. Not only was her class extremely valuable and left her students well educated, but her personality and her care left her students empowered. When it seemed like there was no positivity to be found in the world, Dr. Jennings brought it and showed it in class. Dr. Jennings truly changed my life. She supported me at some of my lowest points, sometimes intentionally and sometimes unintentionally. I really cannot say enough positive things. I am so grateful and thankful to have had Dr. Jennings make an impact on my life. She is someone I will never forget. Dr. Jennings, thank you for everything and thank you for being you. I wish you the best, and I send lots of love to you and your grandma as well. Thank you again for your incredible impact on my life. Dr. Jennings deserve a damn raise! She puts in so much effort, not just into her class but for her students as well. Her personal message after doing well on her exam meant a lot to me. It meant even more when she sent me a message to check up on me after I left an explanation for why I didn't complete a lab assignment on her "Lab Thoughts". Seriously Dr. Jennings is a true GOAT. Thank you for educating me this semester, Dr. Jennings.</p>
6	<p>Keep being awesome. You are a gem of an instructor and of a person, and it was one of the greatest honors of my life and of my academic journey to be a part of your courses. Thank you from the bottom of my heart for absolutely everything.</p>
7	<p>Dr. Jennings is the best professor/teacher I have ever had. Maybe in all of years in school. 11/10 we love her. Also her grandma is the best too.</p>
